

New environmental emulsion formula

NBT Trade Emulsion: Developed to the NBT specification and made in the UK to the highest technical and environmental standards (see over), in a modern range of complimentary colours.

- Trade quality
- Proven in use
- Easy to use
- Genuine environmental performance
- Full technical support

NBT Trade Paints: have been used by local authorities, schools, universities, housing associations, private developers and a wide variety of other public and commercial organisations.

Also Available:

- Gloss
- Eggshell
- Primers/Undercoats
- Exterior Timber Paints
- NBT Beek Silicate Paints

NBT New Environmental Emulsion

Paint and Performance

- Easy to use
- Good coverage
- Vapour open formula
- High durability

NBT trade emulsion is trade quality in terms of useability, coverage and scrub resistance. Produced by the UK's premier manufacturer of brand paints and thoroughly tested and quality controlled.

All NBT paints are designed to have **minimum health impact**. Indoor air quality is now a major factor in health and is the cause of many allergic and auto-immune problems. NBT trade emulsions are genuinely solvent free, virtually zero VOC free paints with no chlorinated preservatives, and no hormone mimics. They are also highly vapour permeable, thus assisting moisture control in buildings.

Paint and health

- Non toxic
- Zero solvent
- Virtually zero VOC (0.01%)
- Chlorine and APE free
- High vapour permeability

Paint and the environment

- Low embodied energy
- Low CO₂ emissions
- Reduced Pollution

NBT Trade Emulsions have been reformulated to have at least **30% less embodied energy** (and 30% less CO₂ emissions) than similar conventional trade emulsions. This is mainly achieved by reducing TiO₂ content, the ingredient with most embodied energy and having greatest impact on resource use, habitat destruction and pollution, by over 25%. NBT trade paints are also manufactured in the UK, thus minimising transport CO₂ emissions.

Economics

- Cost Competitive
- Trade terms
- Readily available through distributors

NBT Trade emulsions are highly competitive with standard trade paints of similar quality. There are discounts for large orders and long term partnerships.
